

FABRICATION

Modern Plastics provides precision plastic fabrication solutions for cut-to-size parts, CNC machining, and fabricated assemblies — from prototype to production. We support OEMs and manufacturers with repeatable quality, material guidance, and dependable turnaround.

ADVANTAGES MAY INCLUDE

- Versatility & Customization
- See thru
- Light weight and Durable
- Chemical and Corrosion Resistance
- Impact Resistant
- Cost Effective
- Fast Turnaround
- Eco friendly potential
- Exceptional Quality
- Prototype to Production

APPLICATIONS

- **Aerospace** — food cart, wall panels, compartments, storage
- **Automotive** — Lightweight components, interior parts, lenses
- **Agriculture** — feeder tubes, poultry bins, troughs, livestock partitions
- **Food processing** — wear strips, packaging, containers, processing
- **Medical** — incubators, DNA testing, phantoms, cadaver tables, prosthetics
- **Semiconductor** — static control guarding, tanks, wafer handling, trays, chip carriers
- **Pharmaceutical** — storage container, drug delivery, fume hoods
- **Retail** — Point of purchase displays, menu holders, signage
- **Industrial** — Machine guards - chemical storage tanks, plating tanks
- **Tanks** — storage, liquid transportation, filtration, chemical processing
- **Heavy Equipment** — guards and fenders, chutes, liners, bucket liners
- **Marine** — Tanks, decking, cowls, windows, rod holders, processing tables
- **Security** — bullet resistant glazing, pass thru, riot shields

MATERIALS

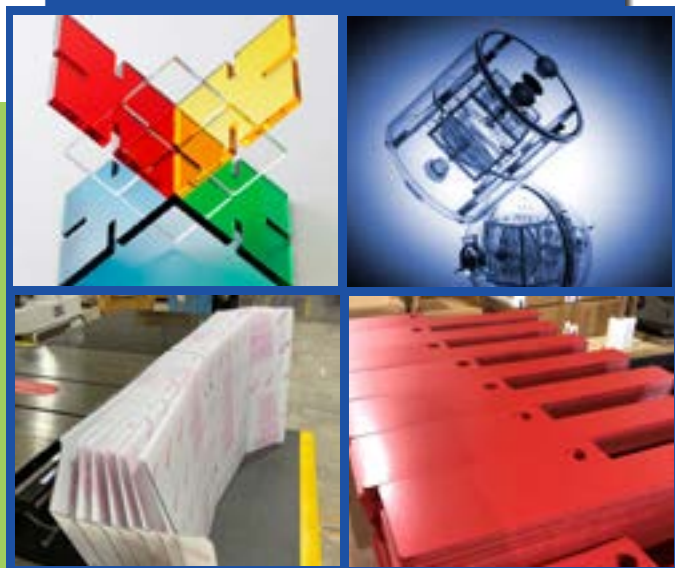

- Acrylic
- Polycarbonate
- PETG
- HDPE
- UHMW
- PVC
- ABS
- Polypropylene
